RE: K & D 78/79-068 TITLE V REVIEW

As of today's date, based on the OSM inspector report, dated 9/10/2019, I have determined that the K & D 78/79-068 site does not meet Title V standards and must remain on the ODM Inspectable Units List (IUL).

There are currently outstanding federal violations on the permit. Until such a time as OSM chooses to terminate those violations, the site will not meet the requirements for Title V release.
