

Safety-Gram

Title 45, Chapter 11

OCTOBER 2010

Volume 11, Number 10

IS IT HOT OR NOT?

Electricity Can Cause Death or Injury

Electrical equipment shall be de-energized before work is done on such equipment.

Section 915.18

- ▶ Always follow safety procedures when working on or around electrical circuits.
- ▶ Never work on an electrical circuit without first using an electrical metering device to ensure the circuit has been de-energized.

REMEMBER SAFETY FIRST
