## Title 45, Chapter 11

June 2012

Volume 13, Number 6

# HIGHWALL SAFETY

**Access roads leading to highwalls shall be blocked when active mining operations are not occurring near the walls. Barriers including, but not limited to rock barricades, and building facades may be accepted as required.**

### Section 910.5

**Men shall not be permitted to work under dangerous walls. Hazardous, overhanging walls shall be taken down immediately, and other unsafe ground positions shall be corrected promptly, or the areas shall be barricaded and posted.**

### Section 910.7

**The supervisor or a certified person designated by him shall examine working areas and faces of walls for unsafe conditions at least the beginning of each shift while men are working, and after blasting. Any unsafe condition shall be corrected.**
