Powered Haulage- Emphasis on Mobile Equipment

Powered haulage includes many different types of equipment. This is part of why it is consistently the biggest contributor of mining fatalities! **16 miners lost their life last year due to unsafe power haulage practices.**

Mobile Equipment Powered Haulage Best Practices:

- Always **construct substantial berms** as a visual indicator to prevent over travel.
- Establish safe traffic patterns with proper signage.
- **Chock the wheels** or turn them into a bank when parking mobile equipment on a grade. **DON'T FORGET the PARK BRAKE!!!**
- Visibility- **Blind Spots**- So many times we have proper task training with multiple pieces of equipment! But do we realize the visual limitation differences in the machines we operate?!

2021 had a bigger accident trend with rubber tires mobile equipment versus track mounted!
